

Event Sourcing

By Group 06:

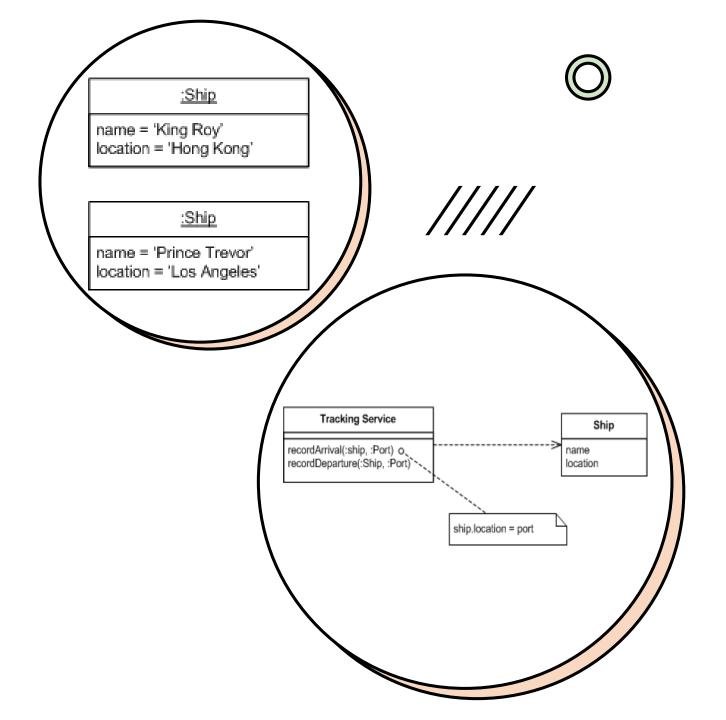

- Alexander López Méndez
- Francisco Manuel Fernández
 Suárez
- Marcos Fernández González

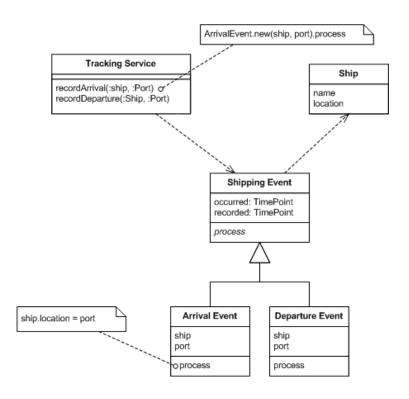

What is event sourcing?

No event sourcing

occurred = ...
recorded = ...
ship = 'King Roy'
port = 'San Francisco'

:Arrival Event

occurred = ... recorded = ... ship = 'Prince Trevor' port = 'Los Angeles'

:Arrival Event

occurred = ... recorded = ... ship = 'King Roy' port = 'Hong Kong'

:Ship

name = 'King Roy' location = 'Hong Kong'

:Ship

name = 'Prince Trevor' location = 'Los Angeles'

With event sourcing

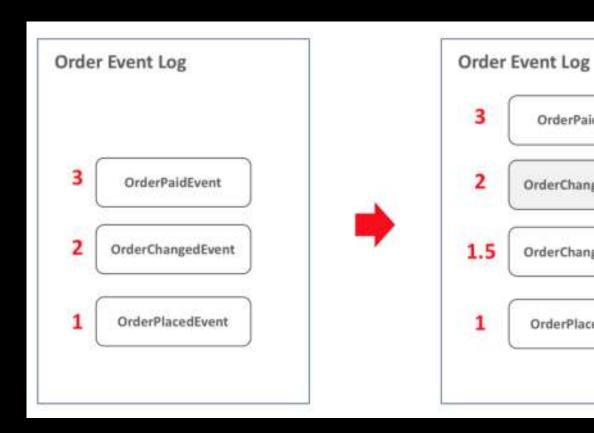

Facilities obtained

Complete rebuild

Temporal query

Event Replay

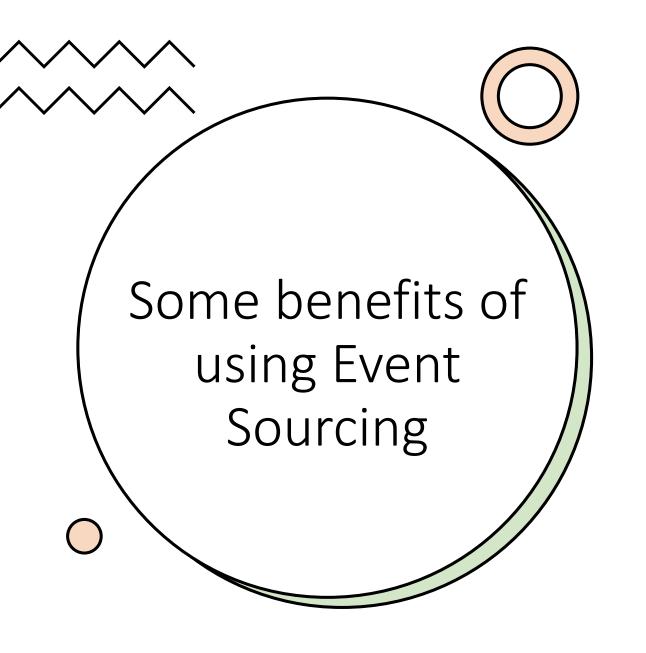

OrderPaidEvent

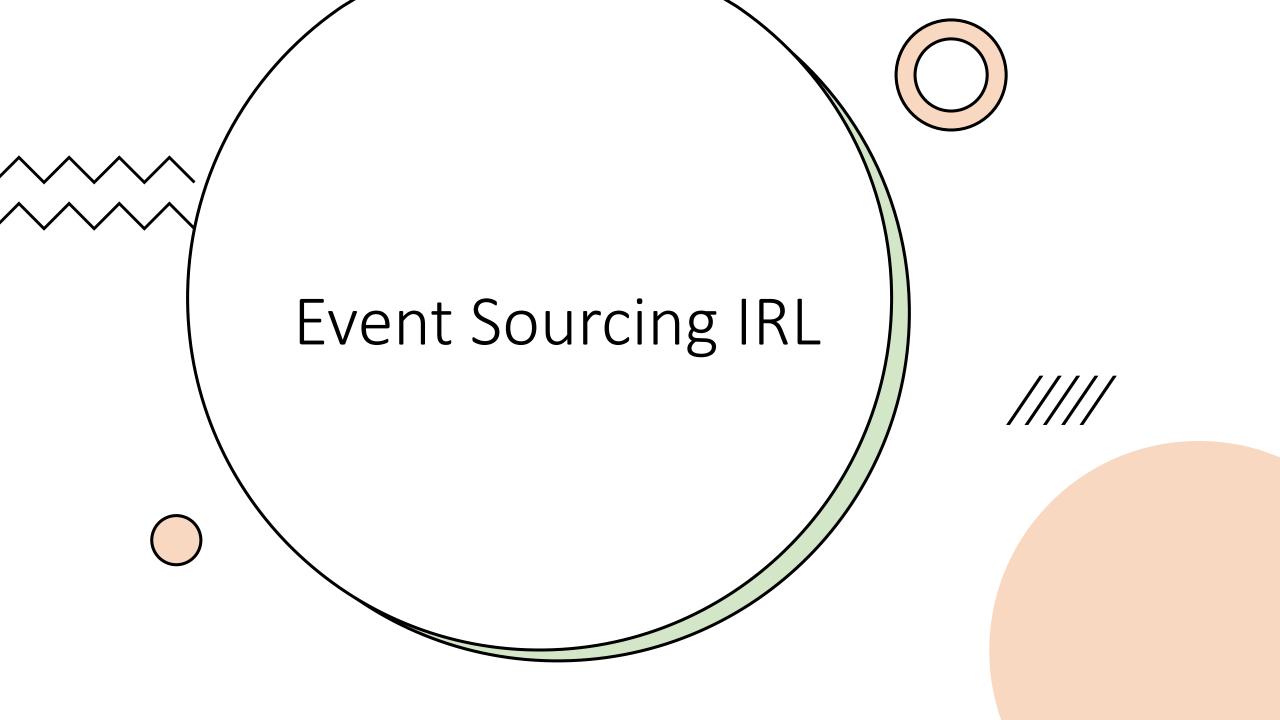

OrderChangedEvent

OrderChangedEvent

OrderPlacedEvent

- Increased data quality
- Relatable architecture
- Quick reaction
- Scalability
- Service provisioning
- Historical record

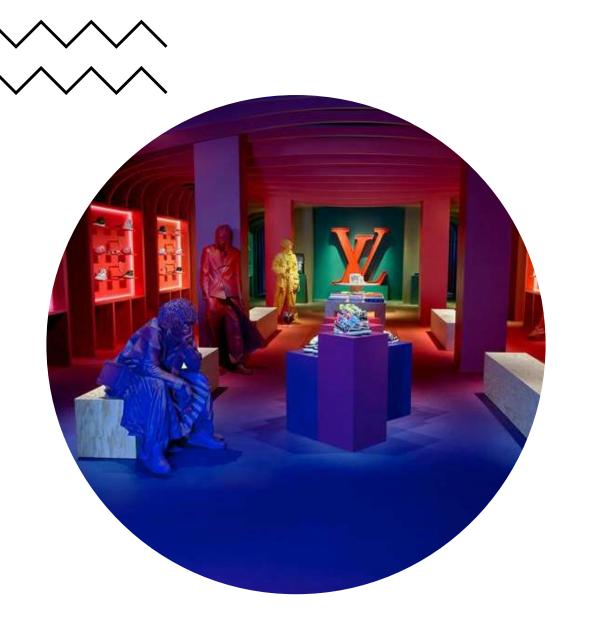

A game of chess

• Every move is recorded to a log/ledger with the information necessary.

• As they are recorded in such a way, you could easily go backwards to movement 2 or forward to the last move.

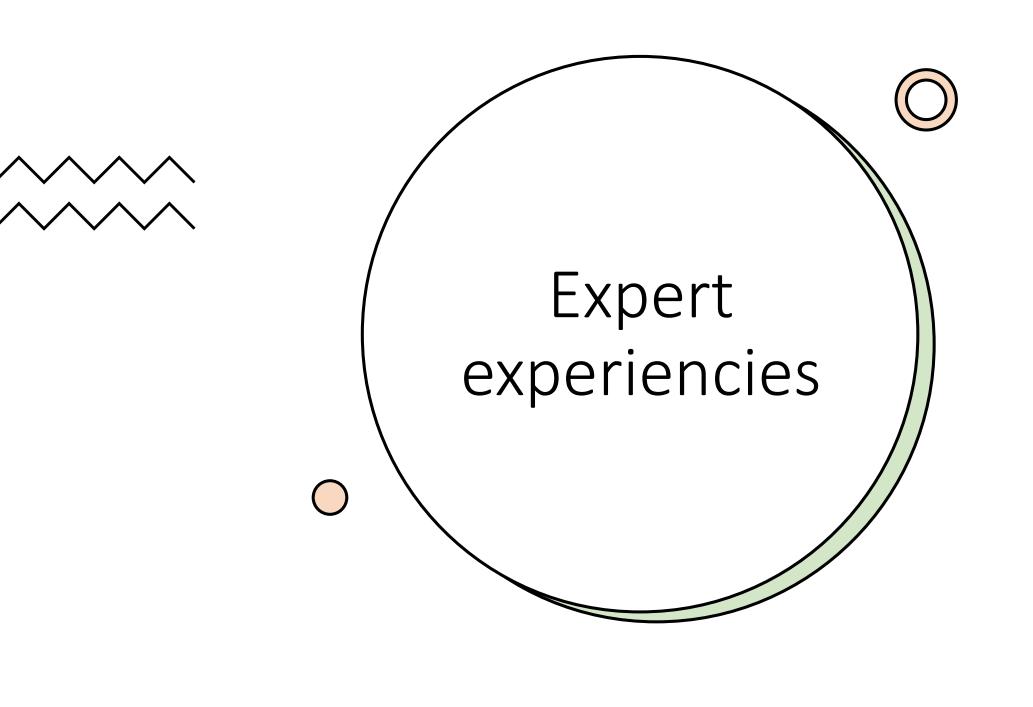

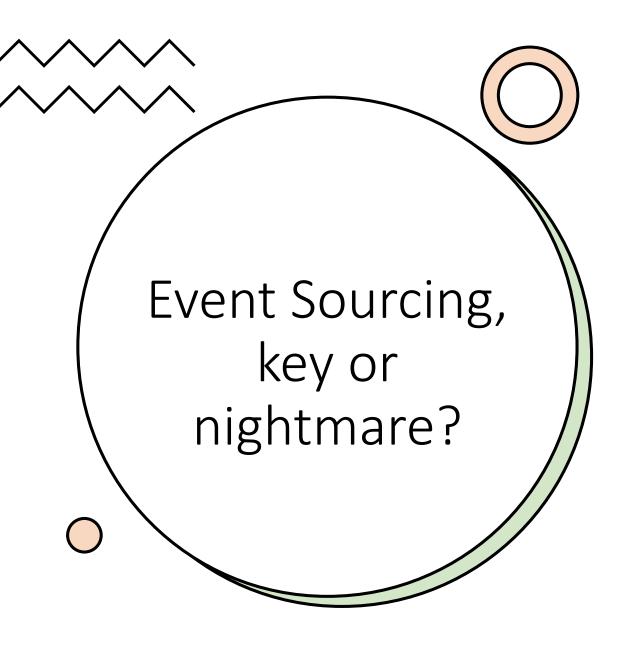

A Shop

 Every item sold, exchanged, received or sent back is recorded in the log/ledger as follows:

- Shirt Exchanged \$35
- Belt Sold \$45 Customer 55
- Jeans Sent back Quantity 10

- You need knowledge
- Very coupled
- Opaque
- Slow building process
- TeamWork
- Heterogeneous
